- The mounts are installed with Chemlink M1 sealant, which should last the life of the panels. - I'm pretty super paranoid about water penetration, having went through a fiasco with our previous builder over mold issues, so I'll be monitoring the setup to ensure there aren't leak issues. I would do the same with any install system.

Traditional residential solar panel systems use a string inverter: multiple PV modules are connected to one another and then to a solar inverter or charge controller. Solar panels with built-in inverters on each unit -- also known as microinverters -- are a relatively recent innovation, and we'll cover those in detail below.
