The Faroe Islands, like all other countries in this part of the world, are undergoing a green transition in energy production and energy use. Formally, the process began with a unanimous decision in the Faroese parliament in 2009, which committed the future governors to an energy policy that by 2020 would reduce total CO2-emissions by 20% ...

The Faroe Islands are an archipelago within the Kingdom of Denmark between the Norwegian Sea and the North Atlantic Ocean. The total area is 1,400 km² with a population of 50,000. The islands have a current installed renewable generation capacity of 60 MW from hydro and wind resources, totaling almost 60% of the island's power production.

There is no shortage of renewable power in the Faroe Islands, due to the ocean currents and tides of the Northeast Atlantic and an abundance of strong wind. With an existing network of hydropower from mountain streams and lakes, ...
