Can US energy suppliers find opportunities in Malta?

U.S. suppliers of renewable solutions may therefore find opportunities in Malta. Further, this gives rise to opportunities for U.S. energy storage technologies and batteries, which assist in flattening the demand curve and smoothing out Malta's energy supply.

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

Why does Malta need battery storage?

Malta also seeks to secure battery storage to aid with problems of energy intermittency that comes with widescale adoption of renewable energy sources like solar and wind.

What is Ewa's vision for Malta's power sector?

EWA's vision for Malta's power sector foresees sustained growth of generation from renewable sources, powered by indigenous onshore solar PV installations, large-scale offshore renewable technologies, such as floating wind and solar, and green energy imported over interconnections with neighbouring countries.

Can Malta import hydrogen from Italy?

Malta is also actively studying the possibility of importing hydrogen from Italy through the Melita TransGas Pipeline project, which will not only end Malta's isolation from the trans-European gas network but will also provide an opportunity to import renewable gases, such as green hydrogen or biomethane, once the market develops.

What is the best prospect industry sector for Malta?

This is a best prospect industry sector for this country. Includes a market overview and trade data. Malta's demand for electricity has increased by 18 percent over the past four years and is expected to grow from 2,500GWH to 3,000GWH, with peak demand growing from 445MW to 538MW in six years' time.
