Now the first of many new energy solutions is coming to fruition: the Alfa Laval E-PowerPack. Able to convert waste heat directly into electrical power, the E-PowerPack reduces fuel consumption and CO<sub>2</sub> emissions - ...

The Alfa Laval E-PowerPack is a compact, easily installed module for converting waste heat energy into clean electrical power. Based on Organic Rankine Cycle (ORC) technology, it gives marine vessels a plug-and-play efficiency upgrade that reduces fuel costs, shrinks carbon footprint and enables

With its twin-screw compressor technology, the E-PowerPack offers long-term reliability and keeps maintenance to a minimum. It provides up to 15 years (or 120,000 hours) of service life before overhaul is needed. From installation and throughout the E-PowerPack life cycle, Alfa Laval Marine Service experts are ready to support you worldwide.

By converting waste heat directly into electrical power, the Alfa Laval E PowerPack is a game-changing advance in marine sustainability. An all-in-one unit for improving a vessel's Energy Efficiency Index (EEDI/EEXI) and ...

It provides up to 15 years (or 120,000 hours) of service life before overhaul is needed. From installation and throughout the E-PowerPack life cycle, Alfa Laval Marine Service experts are ready to support you. Worldwide and 24/7, Alfa Laval Marine Service is your path to greater uptime, optimized performance and true peace of mind.
