Algeria -- a nation traditionally dependent on gas -- is set to take significant strides in solar energy through two large-scale solar tenders with a combined capacity of 3 GW. This marks a shift for the country, where solar energy has been largely limited to remote Sahara villages and research projects.

Algeria's renewables capacity has gone nowhere since the country added 300MW of solar PV in 2016-17. A mere 90MW was added over the following six years, the majority off-grid rooftop solar, a figure which was smaller than the shrinking of Algeria's hydropower capacity.
