

Ampion energy Morocco

How has Morocco developed a green energy sector?

(42) Morocco has taken a number of steps to develop this energy sector, including the creation of the National Green Hydrogen Commission, bringing together public and private players, the launch of a study to draw up a green hydrogen roadmap, and the development of an integrated programme for the production of green ammonia.

What does the 50-50 partnership mean for Morocco?

The 50:50 partnership aims to supply green hydrogen, green ammonia and green fertilisers to Morocco, Europe and international markets, OCP Group and Fortescue say, noting that it also includes the potential development of manufacturing facilities and an R&D Hub to advance Morocco's fast-growing renewable energy industry.

Is Morocco developing a strong foundation for green hydrogen production?

Morocco is developing a strong foundation for green hydrogen production, benefiting from its excellent natural conditions. The Moroccan government has allocated one million hectares of land for green hydrogen projects and is actively seeking both national and international investors to participate in these initiatives.

Can energy become Morocco's New Green emergence?

Energy can thus become Morocco's new green emergence. Morocco's renewable energy potential, which is now more competitive, is remarkable. It virtually represents a production capacity equivalent to that of Nigeria or Venezuela.

Could Morocco reshape Europe's geopolitical balance by 2050?

(13) In the near future, Morocco could play a key role in supplying Europe with green energy via electricity or hydrogen, thereby reshaping the geopolitical balance in the region. The new European commitments to carbon neutrality by 2050, formalised in the Green New Deal, open up this opportunity.

Is Morocco a model for energy transition?

Endowed with an ambitious, pragmatic and forward-looking vision, Morocco is a model to follow in terms of energy transition thanks to its political and social stability, the Kingdom is undergoing major transformations in several sectors, and is betting more than ever on green hydrogen.
