

Antarctica centrica energy

Does Centrica have a role in the energy transition?

Centrica has a role at every step of the energy transition. When it comes to energy, we make it, store it, move it, sell it and mend it. Find out how we're energising a greener, fairer future. Net Zero isn't next, it's now. Join us on our mission to energise a greener, fairer future. Supporting our customers through...

Who is Centrica Energy?

Centrica Energy is our global energy trading and logistics arm. We trade power, gas, LNG, and energy attributes and connect producers, suppliers and offtakers in the wholesale energy markets - and we provide our clients with the best route-to-market services available to the market today with physical and financial settlement approaches.

Does Centrica Energy support energy security?

The volume supplied is sufficient to heat 400,000 homes per year, further cementing Centrica's global role supporting energy security. The deal follows similar agreements over recent years, demonstrating Centrica Energy's innovative partnership approach, one of the key pillars of its successful and growing LNG business.

Why is Centrica partnering with Coterra?

Coterra's Chairman, Chief Executive Officer, and President, Thomas Jorden, said: "The U.S. has an abundant, low-cost natural gas resource that can help support energy reliability and energy affordability around the world. This important new partnership between Centrica and Coterra is a positive step in serving critical energy needs.

Are Antarctica's research stations using wind to generate electricity?

Wind-energy use is becoming increasingly prevalent at Antarctica's research stations. The present study identified more than ten research stations that have been using wind to generate electricity. The installed wind capacity, as identified by the study, is nearly 1500 kW of installed capacity.

What is a hybrid energy system in Antarctica?

Many national Antarctic programmes (NAPs) have adopted hybrid systems combining fossil fuels and renewable energy sources, with a preference for solar or wind depending on the specific location of the research station and previous experiences with certain technologies.

The present study maps the current use of renewable energy at research stations in Antarctica, providing an overview of the renewable-energy sources that are already in use or have been tested in the region.
