

Apus energy Nepal

What's going on with APUs energy's ocean BlackRhino drilling deal?

More by Dean Mikkelsen In a landmark deal signaling robust growth, Apus Energy, the Dubai-based energy conglomerate, has entered into a formidable drilling contract for Diamond Offshore's state-of-the-art Ocean BlackRhino drillship to tap into a promising exploration well off the coast of Guinea-Bissau.

Why is APUS energy acquiring Petronor?

Furthermore, Apus Energy's strategic acquisition of PetroNor's interests in the offshore Sinapa and Esperan's licenses, including the promising Atum and Anchova prospects estimated to hold 467 million barrels of oil, has been pivotal in this development.

What is Nepal's wind energy potential?

Nepal has substantial wind energy potential, with estimates of over 3000 MW total capacity. Around 448 MW is commercially viable for electricity generation. Nepal's wind energy potential is concentrated in the high mountains and mid-hills regions, with favorable sites over 3,300 meters above sea level.

How much electricity does Nepal use?

15000 MW of electricity, increase per capita electricity to 1500 kwh and decrease the commercial energy use per unit of GDP from 3.20 ToE/mRs in 2015 to 3.14 ToE/mRsin 2030 (Source: Nepal's Sustainable Development Goal, Ba

What is the main energy source in Nepal?

Biomass is by far the most important primary energy source in Nepal. Biomass comprises wood, agricultural residues and dung. One major problem with this is that burning these biomass substances for cooking is a common practice (87.3%) and thus exposes those living in the house to harmful air pollutants.

Is Nepal able to get 100% electricity in 2024?

The electrification rate in Nepal has notably improved in recent years, with access rising from 93% in 2020/21 to 94% in 2021/22. The government aims to achieve 100% electricity access nationwide by 2024. In the wet season, Nepal exports its surplus hydroelectricity to India through Indian Energy Exchange.

2. Introduction The computer market in Nepal has been ever-growing. More and more consumers feel the need to have a computer at their disposal, but the majority of them, have a tight budget. Many consumers buy computers with old microprocessors (like the outdated, refurbished Intel Core2Duo) thinking it is their only choice for a budget computer.

OverviewRenewable energyOil productsBiomassBiogasCoalOtherSee alsoRenewable energy in Nepal comes from hydropower, solar energy, biomass, biogas, and wind energy. Nepal has favorable solar resources, receiving average solar radiation of 3.6 to 6.2 kW/m /day. Sunshine duration is around three hundred days per year or 6.8 hours per day, equivalent to approximately 2100 hours annually. This indicates good potential for solar power generation acr...
