

What is Argentina's energy transition?

With its increasing focus on wind and solar energy, Argentina's dependence on gas has steadily decreased since 2019. Argentina aims for 47% renewable electricity by 2030, while the IEA's Net Zero Emissions scenario sets out a global target of 60% renewable electricity by 2030. Explore the latest data on Argentina's energy transition.

How much energy does Argentina use?

In 2020 Argentina continued to derive more than three quarters of its total energy supply from fossil fuels. Natural gas contributed 59% (up from 54.90% in 2019), followed by oil (27%, down from 32.81% in 2019).

Is Argentina bulking up state-owned energy firm IEASA?

What is Energa Argentina SA?

Energa Argentina SA is the state-owned energy agency responsible for the production, transport, and trade of petroleum, natural gas, and electricity. MAyDS (Ministerio de Ambiente y Desarrollo Sostenible) is the Argentine environmental authority responsible for granting licenses for new power generation projects.

How renewable energy penetration can be achieved in Argentina?

Renewable energy penetration. In order to reach the 20 % target for 2025, installed renewable generation capacity must increase to 10,000 MW from a current base of only 800 MW in operation in the country. Power demand in Argentina has historically grown by 2-3% p.a. and it is high

Are Argentine oil and gas companies moving towards the power industry?

The Argentine market is not stranger to the shift of oil and gas companies towards the power industry. Different long-standing Argentine oil and gas companies like Tecpetrol, Pan American Energy (PAE) and YPF have been investing in renewable generation projects in the past years.

The new company, Pan American Energy Group (PAEG), will be the largest privately-owned integrated energy company operating in Argentina. PAEG will be owned equally by BP and Bridas Corporation, itself a 50:50 joint venture of Bridas Energy Holdings of Argentina and CNOOC Limited of China. PAE is currently owned 60% by BP and 40% by Bridas ...

Analyzing the energy sector, Markous declared Vaca Muerta to be a "game-changer" for Argentina, providing 150 years of gas and 75 years of oil reserves. "In 2024, over 55% of the barrels produced in Argentina are

Argentina res energy

coming from unconventional sources. By 2030, we anticipate producing 1.5 million barrels per day, thanks to Vaca Muerta."

U.S. energy giant Exxon Mobil agreed on the terms and conditions to sell its oil and gas assets in Argentina's Vaca Muerta formation to Pluspetrol, a source at Exxon Mobil said on Wednesday.

Argentina continues to ramp up oil production Average daily production of oil, gas condensate and light hydrocarbons (ethane, propane and butane) in Argentina rose by 4% in 2023, reaching 819,000 barrels per day (bpd), and added another 6% in the first nine months of 2024 (to 866,000 bpd), according to the U.S. Energy Information Administration (EIA).

Argentina's energy sector regulatory framework seeks to provide greater market certainty and attract foreign investment to boost oil and gas production for exports. Given its current economic challenges, the Argentine governments at the federal and provincial levels continue to play a significant role in critical industries of the economy ...
