

Aspo energy ltd RÃ©union

We are trading in - D2 Diesel Gas Oil D2 is a refinery abbreviation for Gasoil. It is the second distillate from the crude oil, and can be used without reformers and additives. So, the first engines used D2 as fuel -- before petrol cars as we know them today was invented. That is because the engine invented by a German called Diesel, requires no spark plugs. The diesel engine will ...

Trading in the ASPO ENERGY company "s DNA. Our teams are highly experienced, global, multi-Network and asset-backed. ASPO ENERGY has diversified its business to trading in a wide spectrum of commodity products ...

We are trading in - MAZUT Mazut is a heavy, low quality fuel oil, used in generating plants and similar applications. In the United States and Western Europe, mazut is blended or broken down, with the end product being diesel. ...

ASPO Energy Ltd | 425 followers on LinkedIn. Trading in Fuel, Oil & Gas | ASPO ENERGY is a trading company which specialized in fuel, oil, gas, and energy products trading across the globe.

We are trading in - Light Crude Oil Light Crude oil is liquid petroleum that has low density and that flows freely at room temperature. It has low viscosity, low specific gravity and high API gravity due to the presence of a high proportion of light hydrocarbon fractions. It generally has a low wax content as well. On the other hand, heavy crude oil or extra heavy crude oil is any type of ...

We are trading in - Virgin Oil D6 D6 is a type of residual fuel, mainly used in power plants and larger ships. The fuel requires to be preheated before it can be used. It is not possible to use it in smaller engines or vessels/vehicles where it is not possible to pre-heat it. D6 is its name in the USA. In other parts of the world it has other names. Residual means the material remaining ...

Our Company; Our Offices; Management Team; Company Profile; Parent Company; Products. Fuel Products. Aviation Turbine Fuel Jet A1; Aviation Kerosene Colonial Grade 54 Jet Fuel JP 54; Virgin Oil D6; Diesel EN590; Gasoline 95; Automotive Gas Oil; D2 Diesel Gas Oil; 10 PPM Diesel; Petroleum Coke; 500 PPM Diesel; Gasoline 89 87 93; Naphtha; MAZUT ...

We are trading in - Automotive Gas Oil Automotive Gas oil, also known as diesel, is generated from crude distillation process and is used to efficiently power internal combustion diesel engines. Our diesel conforms to the specifications from the Department of Petroleum Resources (DPR). Automotive Gas Oil, or AGO, is the name given to fuel intended for use in road ...

We are trading in - Base Oil SN 3500 Base oil SN350, is defined as a light grade base oil in the middle of the

Aspo energy ltd RÃ©union

specifications of Grade I base oils. They are mainly used in lubricant and lubricant additives production. It has been solvent refined, dewaxed, and hydrogen treated to take out impurities. This oil has no impurities or compounds that can have an adverse effect on the ...

We are trading in - Lithium It is an undisputed fact that climate change and the danger posed by carbon emissions to the environment is the most pressing problem faced by our planet. People and governments have understood that there is little time left to address and reverse this phenomenon. That is why we have seen more legislation restricting carbon emissions, and ...

We are trading in - IMPCA Notes: Sulphur Whilst the scope of ASTM D 5453 is stated to be for various fuels containing 1.0 to 8000 mg/kg total sulphur, IMPCA consider this method to be suitable for the determination of total sulphur in methanol provided that the laboratory performing the analysis has demonstrated that it can achieve a Limit of Detection < 0.5mg/kg with the ...

We are trading in - Base Oil N70 Pure Performance 70N is a high purity, low viscosity paraffinic oil produced from a high-pressure hydrocracking and hydro-dewaxing process that removes virtually all metals, sulfur, and nitrogen from the feedstock. Customers purchase Pure Performance 70N for a wide variety of uses, including use as a process oil, ATF formulations, ...

We are trading in - Naphtha The main uses of petroleum naphtha fall into the general areas of (1) precursor to gasoline and other liquid fuels, (2) solvents (diluent) for paints, (3) dry-cleaning solvents, (4) solvents for cutback asphalts, (5) solvents in rubber industry, and (6) solvents for industrial extraction processes. The key difference between naphtha and gasoline is that the ...

We are trading in - Base Oil N7, N85, N150, N300 Base oils are used to manufacture products including lubricating greases, motor oil and metal processing fluids. Different products require different compositions and properties in the oil. One of the most important factors is the liquid's viscosity at various temperatures. Whether or not a crude oil is suitable to be made into a base ...

Our Recommended - Oil Terminal Or Tank Farm An oil terminal (also called a tank farm, tankfarm, oil installation or oil depot) is an industrial facility for the storage of oil, petroleum and petrochemical products, and from which these products are transported to end users or other storage facilities. An oil terminal typically has a variety of above or below ground tankage; ...

We are trading in - LPG (Liquefied Petroleum Gas) LPG (Liquefied Petroleum Gas) is predominantly propane and butanes, either segregated or in various ratios and mixtures of each product. LPG is a by-product of crude oil production (Associated Gas) and a by-product of natural gas production (Non Associated Gas). It is also a by-product of the refinery process, ...

We are trading in - Fertilisers DAP and NPK Di-ammonium phosphate (DAP) fertiliser. It is the most popular phosphatic fertiliser because of its high nutrient content and good physical properties. The composition of

Aspo energy ltd RÃ©union

DAP is 18% Nitrogen and P2O5 46%. Within the same facility, Hindalco can also produce nitrogen phosphorus potassium (NPK) complexes as value-added ...

We are trading in - Base Oil SN 500 Base oil SN 500 the most widely used base oil. SN 500 is a light grade base oil at the upper end of the specifications for Grade I base oils. They are mainly used in lubricant production is a Group I ...

Our Company; Our Offices; Management Team; Company Profile; Parent Company; Products. Fuel Products. Aviation Turbine Fuel Jet A1; Aviation Kerosene Colonial Grade 54 Jet Fuel JP 54; Virgin Oil D6; Diesel EN590; ...

We are trading in - HSD2 50PPM Diesel Quest Petroleum Diesel 50 PPM is a highly refined, middle distillate, hydrocarbon fuel; and it contains less than 0.005% sulphur by mass. These extremely low sulphur levels enable the diesel to be compatible with emission control devices such as catalytic converters and diesel particulate traps. ApplicationsQuest Petroleum Diesel ...

We are trading in - Base Oil SN 150 Base Oil Co is one of the leading producers of virgin base oil SN 150, is base oil categorized in group I is a common quality base oil product of which uses in different applications base oils SN150 are used to manufacture products including lubricating greases, motor oil, and metal processing fluids, and many other applications One of the most ...

We are trading in - 10PPM Diesel ULSD is a D2 class diesel fuel material that results from a severe hydrofinishing process. This product is an Ultra-Low sulphur Diesel Fuel (ULSD) in line with EPA's new mandate of less than 15 ppm sulphur content, while improving environmental conditions by reducing unwanted emissions into the atmosphere. Diesel D2 has a high Cetane ...

We are trading in - Automotive Gas Oil Automotive Gas oil, also known as diesel, is generated from crude distillation process and is used to efficiently power internal combustion diesel engines. Our diesel conforms to the specifications ...

We are trading in - Base Oil N7, N85, N150, N300 Base oils are used to manufacture products including lubricating greases, motor oil and metal processing fluids. Different products require different compositions and ...

We are trading in - Aviation Kerosene Colonial Grade 54 Jet Fuel JP 54 Aviation Kerosene Colonial Grade 54 Jet Fuel JP 54: Jet fuel A-1. Jet fuel designed for use in aircraft powered by gas-turbine engines. It is clear to straw-colored in appearance. The most commonly used fuels for commercial aviation are Jet A and Jet A-1 are produced to a standardized international ...
