

Aurora's Grid a mis au point un logiciel de gestion de l'énergie et de dimensionnement pour les systèmes énergétiques de batteries Li-ion. Le logiciel associe les connaissances électrochimiques approfondies des batteries Li-ion, les contraintes du réseau électrique et les techniques de prévision par apprentissage automatique.

One of the key drivers of the energy storage market in Greece is the government's commitment to transitioning to a cleaner and more sustainable energy system. In this respect, we are thrilled to announce a strategic joint ...

Aurora's Grid had developed an ageing aware energy management (EMS) and sizing software for Li-ion Battery Energy System (BES). The software couples deep electrochemical knowledge of Li-ion batteries, power grid constraints and machine learning forecast techniques. Aurora's Grid started experimental validation along with industrialization phase ...

Aurora's analysis show that operating a grid-connected electrolyser in this way can significantly reduce its overall operating cost versus an electrolyser which runs in all hours of the year. Germany has in place numerous grid fee exemptions for electrolysers built before 2030 that can certify their "green" credentials.

Thanks to a machine learning approach and breathtaking knowledge on battery, Swiss start-up Aurora's Grid has developed an algorithm that increases the battery lifetime. The founder of Aurora's Grid, Dimitri Torregrossa, decided to launch his start-up while he was spending holidays in Greece in the summer of 2016. After ten days of vacation ...
