

Austria radioactive storage cabinet

What is a radioisotope storage cabinet?

The Radioisotope Storage Cabinet is designed for safely storing radioactive materials. It features 12 key-locked drawers. Each drawer is easily removed for cleaning or decontamination. A card slot identifies contents. View our complete range of Lead-Lined Storage Cabinets.

Does nuclear Shields manufacture lead-lined storage cabinets?

Nuclear Shields manufactures lead-lined storage cabinets and lead-lined containers for radioactive sources. These cabinets can be used for various applications and can be custom made to your dimensions, amount of drawers and more. Storage of radioactive materials requires the use of radiation shielding.

How do you store radioactive materials?

Storage of radioactive materials requires the use of radiation shielding. The radioactivity can be shielded by placing the radioactive materials into a shielded containment such as a lead shielded cabinet, lead shielded safe or a lead shielded container.

How can radioactive materials be shielded?

The radioactivity can be shielded by placing the radioactive materials into a shielded containment such as a lead shielded cabinet, lead shielded safe or a lead shielded container. Nuclear Shields is a radiation shielding manufacturer and designs shielding solutions for storing radioactive materials.

What are radiographic exposure devices?

So called radiographic exposure devices are used to perform this analysis. The Sentinel Delta 880 is an example of a gamma exposure device used to test welds of pipes for example. These devices need to be safely stored in order to meet ALARA safety recommendations.

Discover Ultraray's Lead-Lined Laboratory Cabinets, the ultimate in safe radioactive material storage for nuclear medicine and radiopharmacy. Our cabinets come with customizable lead shielding options to meet stringent safety standards. Designed for functionality, they feature key-locking security, label slots for easy identification, and are ...
