

Axon energy Eritrea

What is axon energy services?

At AXON Energy Services, our mission is to provide quality energy equipment and responsive global service tailored to each customer's specific needs for success. From customized product solutions to exceptional aftermarket services, your success is our number one priority.

Does Eritrea have a solar farm?

Eritrea is lagging far behind in the electrification of its territory and is now turning to renewable energy. The government has launched the country's first solar farm, a 30-MW facility 30 km from the capital, Asmara.

How much energy does Eritrea use?

Energy in Eritrea is an industry lacking in natural resources, though it has plenty of potential. Eritrea's final consumption of electricity is 33 kilotonne of oil equivalent (ktoe). In 2019, some off-the-grid community systems rely on a combination of solar power, diesel generators and grid batteries.

The AXON Type 32 drilling choke utilizes two flat tungsten carbide discs with a half round cut out in each disc, available in manual and hydraulic configurations. One disc remains stationary while the other rotates, providing a variable orifice according to requirements. In addition, the lapped matting surfaces of the discs provide a positive seal when the choke is closed.
