Will Azerbaijan generate 30% of its energy by 2030?

Azerbaijan has set a target of generating 30% of its energy capacity from renewables by 2030. The country's total solar capacity reached 282 MW at the end of last year, according to figures from the International Renewable Energy Agency (IRENA). Azerbaijan's first-ever solar auction, for a 100 MW project, launched earlier this year.

Will Azerbaijan build two new solar projects?

Azerbaijan has approved the construction of two new solar plants totaling 760 MW in the southeastern part of the country. Abu Dhabi Future Energy Co. (Masdar) will oversee the development of the projects. Utility-scale solar developer Masdar is set to develop two new solar projects in Azerbaijan.

Is Azerbaijan ready for green energy?

"Laying the foundation of 3 stations with a capacity of 1 GW is not only a first in the field of green energy in Azerbaijan, but also a bright indicator of our solidarity and commitment to the energy transition," said Shahbazov. Masdar completed a 230 MW solar plant in Garadagh, near Baku, in October 2023.

When did Azerbaijan start installing a solar plant?

Azerbaijan began installment of its first major solar plant in 2023. The government of Azerbaijan aims to increase share of renewables in total electricity production to 30% by 2030. Azerbaijan's renewable energy sources are hydropower, wind, solar, and biomass power plants.

What is Azerbaijan's wind and solar potential?

That includes 23,000 megawatts of solar energy, 3,000 megawatts of wind, 3,000 megawatts of biomass burning, and 700 megawatts of geothermal energy. The optimistic estimates for Azerbaijan's wind and solar potential are backed up by the International Renewable Energy Agency (IRENA) in a November report.

What is Azerbaijan's energy security policy?

One of the main goals of the energy security policy implemented under the leadership of the President of the Republic of Azerbaijan Mr. Ilham Aliyev is to strengthen the use of renewable energy sources in the country.

Azerbaijan is rich in fossil fuels and these sources can provide energy security of the country for the subsequent decades and relax pressure for a change; moderate social consciousness of the necessity of change in energy policy towards renewables; low to moderate technical, legislative and organizational expertise of national bodies in the ...
