The central goal of the BESA Geo-Energy Program is to play an important role in ensuring Israel's continued prosperity through its natural resources and cutting-edge energy technologies. Our object is to prepare Israel for long-term environmental challenges, and to advance adaptation and mitigation solutions as a tool for deeper regional ...

Belarus: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Belarus is growing increasingly isolated and is pushing itself more and more into Russia's embrace. Moscow is taking the opportunity to cement Belarus as a buffer state against Western geopolitical influence. But contrary to the established analysis, unless there is a real chance of a pro-Western government being installed in Minsk, Russia is unlikely to push for ...
