

Belenergy United Kingdom

The United Kingdom is a global leader in decarbonisation: it has set ambitious targets regarding current emissions reductions and carbon budgets. The UK power sector is undergoing a deep transformation, due to a coal-to-gas switching combined with a recor

The United Kingdom relied on fossil fuels for 40% of its electricity in 2023. Its per capita emissions were below the global average, and three times lower than in 2010. The country still relies on gas for 34% of its electricity production, but its coal phase-out is almost complete with the last remaining coal plant set to close by October 2024.
