

Belgium leader energy

How can Engie become a leader in Belgium?

In order to become the leader in Belgium in the energy transition that will enable us to build a carbon-neutral economy, ENGIE masters all the energy professions: production, consumption optimization, research, innovation, maintenance, engineering, construction and project implementation.

What is energy in Belgium?

Energy in Belgium describes energy and electricity production, consumption and import in Belgium. It is governed by the energy policy of Belgium, which is divided between several levels of government.

How is the energy sector shaped in Belgium?

The energy sector in Belgium is shaped by the policies of its national and regional governments as well as the European Union. The monitoring of the electricity and natural gas market happens on three regional levels, the Brussels-capital region, the Flemish region, and the Walloon region.

What is Belgium's energy policy?

It is governed by the energy policy of Belgium, which is divided between several levels of government. For example, regional governments are responsible for awarding green certificates (except for offshore wind parks) while the national government is responsible for all nuclear power.

How many energy experts does Engie have in Belgium?

ENGIE employs 7,500 experts in energy and energy services in Belgium. ENGIE aims to take the lead when it comes to a carbon neutral transition, i.e. offering customers, companies and local communities the means to easily achieve an energy transition at the lowest possible cost.

Will the European Commission approve Belgian energy plans?

Belgian government contacts confirmed the European Commission (EC) is likely to formally approve Belgian plans to allocate over EUR350 million in subsidies to energy operators that want to build at least two new gas-fired power plants and invest in clean energy sources in Belgium.
