Medley (2005) indicated the spiny lobster (*Panulirus argus*) stock in Belize appears to be heavily exploited. Gonzalez (2007) made a first attempt in approximating the lobster population of Belize using cohort analysis; which resulted in that the Fishing mortality was high as 0.7 year⁻¹ and annually it is extracted between 40% to 60 % (average 55% for the period) of the stock.

Hi! Looking for tips or info on traveling to Belize as a group of about 10. Not sure if the best locations, safety, good things to do. Budget: about \$1,200 or less per person Time: likely 5 days 4 nights. Location: near the water, would be interested in snorkeling, boat ride, beach time etc.

"The James Group is the perfect fit for us," Frazier said. "Their tools and resources align with our goals, and we have a great relationship with Mike and the team. It's a win-win." The move is expected to have an immediate impact on The James Group's production and solidify its position as a leader in Belize's real estate market.

The Belize National Spawning Aggregation Working Group was established in July 2001 in response to a nation-wide survey of spawning aggregations of the Nassau grouper in early 2001 that revealed very low numbers of spawning fish. During 2002 a coalition of seven NGOs worked successfully to protect 11 of the Nassau grouper spawning sites, and to introduce a four ...
