

Benin 2 g energy

What is the energy mix in Benin?

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire.

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

How much energy does Benin produce?

Energy production According to the ERA, national electricity production in Benin increased sharply between 2010 and 2015, from 113.6 GWh to 323 GWh. Production in 2015 came mainly from thermoelectric power plants using oil and natural gas.

How can Benin meet its energy needs?

Improving Benin's ability to meet its energy needs, particularly ensuring adequate access to electricity, is a critical goal of the Beninese government to support economic development and foreign investment. Benin depends on Nigeria and Ghana for the majority of its energy, and continues to suffer from insufficient supply.

How much biomass does Benin use?

It is worth noting that final energy consumption using biomass in Benin was 46.3%, or 49.3% that of Mali's final biomass energy consumption (4175.8 ktoe), and that of Burkina Faso's (3915.4 ktoe).

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.

APEX Energy - Germany. At APEX Energy Teterow GmbH in Rostock-Laage, Germany, an agenerator 404c H 2 from 2G Energy with an electrical output of 115 kW (129 kW thermal) was commissioned in April 2020 as a plug-and-play container solution. According to the industrial requirements of APEX, the CHP system serves for self-sufficiency.

Do you wonder how it is possible to reconcile your current energy production requirements with those of tomorrow? 2G assists you in finding the right answer: from the first consultation over the proposition of a customized solution to the ...

The development of energy-efficient storage platforms is of paramount importance. Specifically, wearable, smart, flexible, and portable electronic devices with small size, lightweight, and high safety are of urgent need for several applications. To achieve these criteria, green, sustainable, nonflammable, and biodegradable hydrogel electrolytes are essential.
