I have a customer solar camera mounted on the eave of the north side. The solar panel is not getting enough sun to charge the battery. If I just moved the solar two inches up and over by two inches up on to the roof, the panel would get plenty of sun. But as it is, the panel is in shade by the roof edge most of the dayq.

Reolink Solar Panel harvests power from the sun and with a few hours of direct sunlight, it keeps your Reolink Argus 2, Argus Pro, Argus Eco, Argus PT, Reolink Go, etc rechargeable battery camera powered and charged continuously so that you don't have to take down the battery to recharge it or worry about camera power-off.
