"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

Cost - Solar PV panels can be quite expensive to buy initially. Space - Solar PV panels do take up quite a lot of roof space compared to solar thermal systems. Wasted energy - These panels produce a good amount of energy, however they have no way of storing excess power. Unless you buy a solar battery, this extra energy will be wasted.

Peel and Cubico JV submits plans for first Isle of Man Solar Farm & storage. By: Sean Collier. Date: January 25, 2023. 3 min. Plans have been submitted for the first grid-scale solar farm and battery storage on the Isle of Man to provide affordable renewable electricity to residents and businesses and help improve energy security for the Island.

With solar PV panels: instead of selling unused excess solar generated energy to the grid (at half price), it is stored in your battery system for self-consumption later, ideal when the sun has a break. Off-peak electricity: Manx Utilities offer half price off-peak electricity, your battery system can charge with half price electricity at night time, during the day the entire property can run ...
