

Why is energy important in Bhutan?

Energy in Bhutan has been a primary focus of development in the kingdom under its Five-Year Plans. In cooperation with India, Bhutan has undertaken several hydroelectric projects whose output is traded between the countries.

What is the Bhutan energy data directory?

The Bhutan Energy Data Directory is a valuable resource for policymakers, researchers, and anyone interested in the energy sector of Bhutan. It provides a wealth of data and information on various aspects of Bhutan's Energy Sector, including energy production, consumption, and distribution.

What is Bhutan's energy supply?

Bhutan's energy supply primarily relies on electricity, fuel-wood, coal, and diesel. Electricity is the largest contributor, with a shift towards increased usage over the years. Fuel-wood usage has decreased, while bio-gas, solar energy, and limited-scale wind energy have gained traction as alternative sources.

Should Bhutan diversify its energy sources?

In the face of climate change and the need for enhanced energy security, the business case for Bhutan to diversify its energy sources, especially by tapping into alternative renewable energy, is compelling. Bhutan is yet to realize its full potential in terms of renewable energy.

How much energy does Bhutan have?

The Directory reveals that Bhutan's total energy supply increased to 793,263.3 tons of oil equivalent (TOE), with thermal energy sources accounting for 62.4 percent of the energy mix and electricity contributing the remaining 37.6 percent.

How can energy pricing improve energy efficiency in Bhutan?

Reforms to energy pricing can help level the playing field for renewable energy technologies, thus incentivising their uptake in both on-grid and off-grid settings. In the specific case of Bhutan, improving energy efficiency is a fundamental and cost-effective first step towards integration of renewables in all sectors.

Kosovo Energy Corporation (KEK) is the sole state-owned power and Mining Corporation in the Republic of Kosovo. KEK is focused on the production of electricity from coal. The core business of the corporation is the production of coal and energy in Kosovo, through the open-cast coal mines - and two power plants, PP Kosovo A power station and
