

Botswana grid one solutions

How many coal-fired power plants are there in Botswana?

Besides the two coal-fired power plants, currently there are two other significant diesel-fuelled power plants in operation. The first is Orapa with a capacity of 90 MW. The second is Matshelagabedi, a diesel power plant with an installed capacity of 72.54 MW. In line with Botswana's NDP 11 two new renewable energy projects were identified.

Does Botswana have a power supply issue?

Botswana has struggled with a power supply issue for years --with blackouts being implemented-- despite its redeeming qualities. The Botswana Power Corporation (BPC) promised to end its load shedding programme in November 2022.

Is Botswana implementing energy projects based on the IRP model?

Approved IRP Projects In line with the IRP model results, Government of Botswana has approved and is implementing energy projects with a total installed capacity of 795MW (see Table 5) required to meet the growing energy demand at least cost whilst also reducing the country's carbon foot print.

The International Energy Agency (IEA) said Botswana has recently made good progress with its electrification rates through a large push for mini-grid and off-grid solutions in ...
