

Botswana solar power

Does Botswana need a 40% shareholding for solar power?

For utility scale grid-connected solar plants, which include Mmadinare and Jwaneng, Masisi said a mandatory requirement of 40% shareholding by citizen owned companies was provided. Botswana is rich in natural resources and has vast solar energy potential, receiving more than 3,200 hours of sunshine per year.

Is Botswana a good country for solar energy?

Botswana is rich in natural resources and has vast solar energy potential, receiving more than 3,200 hours of sunshine per year. The country's Vision 2036 calls for 50% renewable energy allocation by 2036.

Why did Scatec build a solar power plant in Botswana?

At the groundbreaking ceremony on 22 March 2024, Terje Pilskog, CEO of Scatec, explained that the Mmadinare solar power plant represented "a step towards sustainability, energy independence and economic growth for Botswana.

Will a grid-connected solar project help Botswana meet its electricity demand?

Botswana has launched its first utility scale grid-connected solar project which is expected to help the country meet its electricity demand. Botswana has launched the first phase of a solar project expected to be delivered by next year.

How is Scatec transforming Botswana's electricity supply?

At a time when Botswana is over 50% dependent on South Africa and Zambia for its electricity supply, Scatec is helping to change that. The Norwegian independent power producer (IPP) has just launched work on its 120 MW Mmadinare solar farm, which will be built in two phases. Botswana is committed to decarbonising its electricity mix.

Is Botswana decarbonising its electricity mix?

Botswana is committed to decarbonising its electricity mix. As proof of this, President Mokgweetsi Masisi attended the launch of work on the country's largest photovoltaic solar power plant near the town of Mmadinare in the Central District, 405 km north-east of the capital Gaborone.
