

Burundi deploy energy

How is energy used in Burundi?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Is poor quality power service undermining economic growth in Burundi?

Poor-quality power service is undermining opportunities for economic growth in Burundi and the lack of investments has compromised access to expansion efforts.

Is biomass a source of electricity in Burundi?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Burundi: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What is the ascent Burundi project?

The ASCENT Burundi Project will support the Government of Burundi's (GoB) Universal Access Program, launched in 2023 and will reinforce the medium voltage network across the country while rehabilitating, modernizing, and expanding Bujumbura's distribution network.

How will the gob support grid electrification in peri-urban and rural areas?

To accelerate efforts in expanding electricity access, the GoB will be partnering with the private sector to support grid electrification in peri-urban and rural areas. The project will support a distribution pilot led by Weza Power - a newly created private utility that signed an Interim Public Partnership Agreement with the government.
