mm (100mm x 50mm x 24mm)

Hammond's 1590 series of die-cast aluminum enclosures have a longstanding reputation for quality and ease of use. Casted from high quality alloys, these enclosures are tough enough to withstand every day abuse, but easy to machine for connectors, switches, and other components. The 1590 series is available in over 500 sizes, colors, and configurations.

The Hammond 1556 Enclosures Bring a Modern Design on a Budget . Plastic enclosures made of self-extinguishing ABS material with IP54 have retained both durability and an elegant appearance, offering a cost-effective alternative to the Hammond 1557 series, suitable for all indoor applications.

NEMA stainless steel enclosures by Hammond are designed for harsh indoor and outdoor applications - food, pharmaceutical, marine, and more - where enclosures and their contents are subject to washdown and wet areas. Hammond enclosures come in either 304 or 316-type stainless steel to protect important components in corrosive environments.

Usually, DIN rail enclosures are being produced in so-called width modules (1M = width of 17,5mm). That's why, for example, a 4-Module enclosure is 70mm wide. Hammond Electronics, as our long-term supplier of high-quality enclosures, has introduced a useful range of 5 sizes of DIN rail enclosures. And as it is good practice with this ...
