

What is the institutional framework in Burundi?

The institutional framework in Burundi is complicated by the fact that multiple ministries and agencies have overlapping responsibilities for the energy sector. Four ministries (Energy and Mines; Communal Development; Planning and Finance) play an active role in defining and executing government policy in the energy sector.

What is the most common off-grid electricity source in Burundi?

Go to Top Solar energy is the most common off-grid electricity source in Burundi, although the number of systems installed is very slow. With the global price dropping of solar technologies a small solar sector emerged in the recent years, that offer smaller systems for private households, businesses and public institutions.

What are the energy planning strategies for Burundi?

Energy Planning Strategies for Burundi The Burundian energy supply highly depends on traditional use of biomass. The literature shows that the power supply of this country mainly relies on hydropower generation. Many hydropower projects are under development to increase the electricity access of this country .

What will become the Burundian power sector in long-run?

Although the country is endowed with a huge potential for various energy resources , there is higher uncertainty about what will become the Burundian power sector in long-run. This uncertainty is higher as the target of reaching 30% of electrification rate in 2030 is still far from the current situation (Fig. 2).

How does Burundi generate electricity?

Up to 5% of Burundi's electric power is generated from bagasse by-product of the sugar industry based on co-generation technology. The bagasse is used as feedstock to produce both process heat and electricity.

What is the power sector like in Burundi?

A key feature of the power sector in Burundi is the very low level of electrification. Less than 5% of the population have access to the national grid (average in Sub-Saharan Africa 26%), and even they are facing power cuts on a daily basis during dry season.
