Sionic Energy's breakthrough silicon anode and electrolyte additives unlock the energy density potential of lithium-ion batteries . We have engineered a way to control silicon expansion with our anode design and have limited expansion to only 10% at the cell level. Controlled by using standard low-cost silicon materials with innovative ...

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renew-able energy, and ...

Partnering with leading automotive, mobile device, battery, and chemical manufacturing companies, on those products, Sionic Energy is well positioned in the market for rapid introduction of its complete lithium ion battery technology with expected volume production of the design by the end of 2022.

Analog Africa reports that one of these children was Paulino Vieira, a musical genius who, "by the end of the '70s would become the country's most important music arranger." Eight of the 15 tracks on this album are backed by Vieira's band, Voz de Cabo Verde, which helped shape the "cosmic sound of Cabo Verde" that continues to this day.

Sionic Energy batteries can serve as a lighter and cheaper replacement to the mobility lithium-ion battery market's 2170 batteries with a current energy density of 1050 Wh/L or 350 Wh/kg and a platform that extends performance beyond the early projections of solid-state designs. Our non-volatile, non-flammable electrolyte additives" Multi ...

Praia, October 22, 2024 - As part of ECOWAS Sustainable Energy Skills Certification Program, the ECOWAS Centre for Renewable Energy and Energy Efficiency (ECREEE), as a certification body, in collaboration with the Institute for Quality Management and Intellectual Property (IGQPI) and the Centre for

Cape Verde is a rich country in Renewable Energy resources. We have a strong and constant wind on several islands.

the arid Sahel zone, Cabo Verde faces severe water shortage, which the country addresses more and more through energy intensive desalination, using electricity produced largely by thermal power plants, which depend entirely on imported fossil fuels. The resulting high energy prices directly impact the cost of water production.

Sionic Energy's safer, (non-volatile) electrolyte additives use a proprietary Multi-Functional Molecule (MFM) design methodology that enables specific critical electrochemical function enhancements to maximize the performance of base electrolyte formulations. Sionic's MFM design methodology produces tailored additives, designed rapidly, to ...
