Will Capital Power install a battery energy storage system?

Capital Power is proposing a battery energy storage system (BESS) installation on a parcel of land which is owned by an affiliate of Capital Power and adjacent to the existing YEC. Operating independently of the YEC, the proposed facility would have up to 120 megawatts (MW) of power storage, with electrical energy output for up to four-hours.

Is capital power proposing equipment upgrades at the YEC?

Capital Power is proposing equipment upgrades at the YEC. Learn more about this project. Capital Power is proposing a battery energy storage system (BESS) installation on a parcel of land which is owned by an affiliate of Capital Power and adjacent to the existing YEC.

What does Capital Power do?

At Capital Power, we contribute to the communities in which we operate with the aim of building a lower-carbon future for all. We engage our neighbours, consider their interests and build real relationships. We aim to source supplies and services locally for our operations, as well as hire from the community.

How much power does an AC-coupled PV system use?

The AC-coupled system assumes a DC/AC ratio of 1.4, resulting in a DC size of 210 MW. AC-coupled systems are typically built at a higher DC/AC ratio than standalone PV to maximize the amount of available energy to charge the battery energy storage system (BESS) without sacrificing PV output while the BESS is charging or idle.

Is there a capital cost breakdown for the different reactor types?

The capital cost breakdown for the various reactor types was not provided in the report, nor were the construction completion dates, but construction of all reference projects commenced ten or more years ago.

Does a boiler enclosure cost a CC heat recovery steam generator?

Costs for boiler enclosures are applied to the coal-fired cases and the biomass cases, but not to the CC heat recovery steam generators (HRSGs), which are assumed to open in all regions. It is assumed that the steam turbine generator (STG) equipment will be enclosed for all cases in all locations.
