Cheap solar generators Malawi

Here's a copy/paste of a post I made recently comparing a \$3200 EcoFlow solar generator (that price, BTW, doesn't even include the "solar" part from the company selling the unit). You can see that I can actually completely beat out the unit, even including panels, for about half the cost of the EcoFlow unit by itself.

What is the price of a 500 watt solar panel? A 500-watt solar panel costs approximately \$0.25 per watt. Soft expenses such as hauling, transporting, storage, convenience charges, and other state-specific price adjustment variables, on the other hand, raise the price to \$0.7 to \$1.50 per watt.

Another advantage of portable solar generators is that they are much quieter than gas generators. Gasoline engines produce a lot of noise, which can be a major annoyance. Portable solar generators run silently, so you can use them without disturbances. Finally, portable solar generators are better for the environment than gas generators.

If your average gas generator costs about \$1000 a similar output solar generator is going to cost you somewhere close to \$2000 - and maybe even more. Solar generators have lower operating costs in the long haul to offset that initial expense, but it still a pretty big hit to your bank account right away.
