What will Cuba do about the energy crisis?

The Cuban government plans to invest significantly in photovoltaic parks and wind farms to address the severe energy crisis on the island for several months. The authorities in Havana also intend to support citizens in installing solar panels.

How will Cuba's relationship with other countries impact the energy transition?

Cuba's relationships with other countries will be key to realizing the energy transition. Since 2000, Venezuela has been Cuba's primary source of imported oil. However, political and economic troubles in Venezuela caused oil exports to Cuba to fall by about half, resulting in Cuba increasingly seeking oil imports from Mexico and Russia.

How much fuel does Cuba consume a year?

This increases the damage to the generating plants and, therefore, the unsatisfied demand for parts and maintenance. Of the eight million tons of fuel that Cuba consumes, some five million depend on purchases on the international market, according to De La O Levy.

Cuba aims for renewable energy sources to account for 24% of its energy matrix by 2030. President Miguel Díaz-Canel announced on 27 November that more than ...
