

Cura's akhal energy solutions

Will Aqualectra revolutionize energy management in Cura's by 2030?

As a part of Aqualectra's ongoing efforts to continue improving its services and better serve the people of Cura's, this agreement aims to fully revolutionize energy management in Cura's by 2030, ensuring reliable, affordable, and sustainable energy for the island.

How will a battery energy storage system benefit Cura's?

The implementation of a Battery Energy Storage System will allow Cura's to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored energy can be released to mitigate the intermittency of wind power and ensure grid stability.

What are the economic benefits of Aqualectra's energy management system?

This system also brings us a myriad of economic benefits, such as a cutback in peak demand charges and low electricity bills for consumers and businesses in Cura's. In addition to the Battery Energy Storage System, Aqualectra has also acquired an Energy Management System to further improve energy production and distribution.

Who is Aqualectra?

Aqualectra produces and distributes water and electricity to over 80,000 households and companies on Cura's Island. The company is an existing and valued customer with three engine power plants operating with a combined total of 16 engines. Image caption: Front: Mathias West, CFO Neysa Isenia, Tganni Louisy.

What can Aqualectra do with Wärtsilä solutions?

In addition, the Wärtsilä solutions will allow Aqualectra to expand their decarbonisation vision while smoothing the intermittency of renewables. "We have worked closely with Aqualectra in developing their long-term roadmap," explains Risto Paldanius, Vice President, Americas at Wärtsilä Energy.

Will Aqualectra participate in the CARILEC Conference 2024?

To further highlight the impact of their cooperation, the Aqualectra team has been invited by Wärtsilä to take part in panel discussions at the Chief Executive Officers & Leadership CARILEC Conference 2024, held from May 19th to 22nd in Puerto Rico.
