

Curaçao solar electric station

Does Curaçao use wind and solar energy?

Since the 1980s, Curaçao has been gaining experience in applying wind and solar energy. Curaçao also distinguishes itself from the world with regard to the application of wind and solar energy. In addition, the focus is also on the use of biogas, energy storage and energy savings. Bulbaai conducted an extensive research in Curaçao.

What is Curacao's energy policy?

In 2009, Curacao developed an energy policy document, which sets out general guidance and governing principles for further study of energy issues.⁴ It suggests the goal of reducing energy consumption by 40% by 2020 and encourages the investigation of combining wind power with storage to provide 100% of the island's energy needs.

How much does energy cost in Curacao?

Energy Snapshot Curacao This profile provides a snapshot of the energy landscape of Curacao, an autonomous member of the Kingdom of the Netherlands located on the coast of Venezuela. Curacao's utility rates are approximately \$0.26 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

Does Curacao need electricity?

Like many island nations, Curacao is highly dependent on imported fossil fuels (more than 95% of the island's electricity is generated using petroleum-based fuels), leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Does Curacao have a net metering program?

In 2011, Curacao launched a net metering program for distributed wind and solar generation systems.¹¹ Residential systems smaller than 10 kilowatts (kW) and commercial systems smaller than 100 kW were eligible to participate. At the same time, large commercial customers could apply for a feed-in tariff for systems up to 1 MW in size.

Why does Curacao face energy security issues?

Curacao faces energy security issues not only due to its reliance on imported fuels but also because of the age of its generation infrastructure. Thirty megawatts (MW) of Aqueductra's generation portfolio is beyond its expected service life and the surplus power from the RdK refinery is subject to frequent outages.
