

Cyprus kerr smart energy

Does Cyprus have solar power?

More Energy related stories Sun-drenched Cyprus imports most of its energy, but this is unnecessary: Cyprus has the highest solar power potential in the European Union. Local engineers and researchers, together with energy experts from Austria and Denmark, have worked to develop the use of this natural resource on the island.

Can Cyprus be a hub for solar energy innovation?

Local engineers and researchers, together with energy experts from Austria and Denmark, have worked to develop the use of this natural resource on the island. The research promoted the development of Cyprus as a hub for solar power innovation. The initiative harnessed expertise on all aspects of the solar energy cycle.

How can Cyprus become more energy self-sufficient?

In an attempt to make Cyprus more energy self-sufficient, the EU-funded TwinPV initiative focuses on bolstering the country's technological know-how through the sharing of expertise on the entire solar energy cycle - from cells and modules to storage and smart electricity grids.

How will Cyprus achieve a higher share of renewables?

Cyprus has set out to attain a higher share of renewables, and this roadmap helps to assess optimal investment strategies in the power sector. Solar PV and wind power will play a major role in the roadmap to 2030. Roadmap findings will play an important role to revise existing energy policies and develop new ones.

Can a long-term energy planning model be used in Cyprus?

In order to examine options for economically optimal deployment of renewable energy in Cyprus under different scenarios, and to understand the potential impact of key policy decisions on the power generation mix, a long-term energy planning model of the current power system in Cyprus was developed.

What happens to surplus energy in Cyprus?

A significant amount of surplus energy is therefore not stored for later use, but is instead lost. This is because there is as yet no connection with power grids in mainland Europe, making it hard to export surplus energy. Cyprus is an isolated network, which makes it difficult for the country to rely solely on solar energy.
