Containerized Data Center Quick deployment for edge computing applications in the IoT world In this IT intensive world with heavy data traffic, an edge datacentre acts as a caching and data-aggregation point between users and larger datacentres to ease overwhelming IT loads.

Delta InfraSuite Cooling The most reliable and efficient cooling solutions In order to offer the best possible space utilization, and to accommodate the potentially rapid expansion of new IT equipment, modern data centers have implemented a high-density model, based primarily on blade server technology.

When an event occurs, the Incident Module can help data center managers restore equipment to normal operation with the best repair quality in the shortest possible time, reduce business losses of the enterprise or organization, and ensure the best operation and maintenance efficiency and service continuity.
