

The Dominican Republic urgently needs to ramp up its energy storage capacity to stabilize its electrical system, said its Minister of Energy and Mines, Joel Santos. Santos highlighted the importance of energy storage in the Dominican Republic's energy transition at the Dominican Republic Energy Storage Summit, organized by his department in ...

When countries set targets, measure or compare CO₂ emissions, they tend to focus on production-based emissions - CO₂ emitted within a country's own borders. However, this fails to capture emissions from traded goods - the CO₂ emitted in the production of goods elsewhere, which are later imported (or the opposite: emissions from goods that are exported).
