

Electric storage Cabo Verde

When will Cape Verde's energy storage centre be operational?

During the presentation of the project, Cape Verde's National Director for Industry, Trade and Energy, Rito Vora, announced that the energy storage centre is scheduled to be operational by 2030, with the aim of injecting 7% of renewable energy into the national public grid and 18% into that of the island of Santiago.

Does Cape Verde have solar power?

In 2012 Cape Verde had an installed electricity generation capacity of around 300 MW, of which about 24% from wind power plants and 3% from photovoltaic stations. While solar power has an enormous potential as a source of renewable energy, natural conditions in Cape Verde are one of the best in the world for the production on wind energy.

How much does the Santiago pumped storage project cost?

The Santiago Pumped Storage Project, which will be located in Chã das Gonçaves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase energy storage capacity, thus making it possible to increase the country's electricity production capacity.

Is Cape Verde a viable alternative to fossil fuels?

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renewable energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.

Si la frecuencia del voltaje en su país es diferente a la de Cabo Verde (220 V), algunos dispositivos pueden no funcionar correctamente. Compruebe las marcas del dispositivo antes de viajar. Cada dispositivo eléctrico cuenta con una etiqueta (a menudo en el cargador) que indica el rango de voltios y frecuencia funciona, por ejemplo ...

Fast facts.
