I purchased 2 x Blue Nova Lithium batteries to replace the lead acid type. These will be used on a 24 v inverter. On reading the instructions the BN batteries have to be individually charged first with a 12 V charger. I have a 12 V Ellies charger as well, which I have now used to charge the batteries separately before they get dropped into the 24 V inverter.

Portable PV DC Kit with 84W/h Lithium-ion Battery Suitable for applications such as: Running lights off-grid where there is no power; Can charge devices through USB outputs like mobile phones or tablets as well as run small USB devices
