

Energy storage plunges in late trading

Why did fluence energy stock fall 28% in late trading?

Get in Touch Fluence Energy Inc. shares fell as much as 28% in late trading after the company lowered its full-year guidance, citing the pause of certain US projects due to tariff policy.

How has cost decline impacted energy storage?

This trend may highlight that the cost decline over the past few years has driven energy storage into an era of accelerated diversification in the global market. The European energy storage market added 19.1 GWh of installed capacity in 2024, up 12.4% YoY, with drastic changes in the ESS landscape throughout the year.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

How can manufacturers capitalize on energy storage trends?

To capitalize on this trend, manufacturers should focus on market insights and plan for new opportunities. Developing energy storage has become a global consensus. It was announced at COP29 in late 2024 that global storage capacity will increase to 1,500 GW by 2030, more than six times the 2022 level.

Should energy storage be developed?

Developing energy storage has become a global consensus. It was announced at COP29 in late 2024 that global storage capacity will increase to 1,500 GW by 2030, more than six times the 2022 level. As a result, InfoLink maintains a cautiously optimistic outlook for the medium- to long-term development of energy storage systems.

Why is 2024 a good year for energy storage?

2024 is the start of energy storage in the Middle East and Africa, with 2.7 GWh of capacity. Key points: Tender projects surged, exceeding 40 GWh, mainly from the UAE and Saudi Arabia. China-funded companies led, winning most announced projects. Intense competition lowered bid prices compared to other regions.
