Who are Gridworks Development Partners?

Gridworks Development Partners are the people who are part of the Gridworks Team. They have extensive experience delivering infrastructure projects across Africa and possess the technical, investment, and regulatory expertise to make utility investments work.

Why is Gridworks tackling Africa's biggest infrastructure challenges?

Sustainable, affordable and reliable power is one of Africa's largest infrastructure challenges. Gridworks is committed to tackling this challenge. Gridworks was established in 2019 as a dedicated platform for development and investment in Africa's electricity networks.

What is Gridworks powered by CDC?

Powered by CDC Group. Gridworks has been established by CDC as a dedicated developer and investment platform for electricity network investments, focused primarily on Africa. We are backed by an initial commitment of more than \$300 million from CDC, and the support of the UK Government and its Department for International Development (DfID).

What is the Ethiopia-Kenya Electricity Highway (EAPP)?

The EAPP is one of five power pools in Africa, which, with the help of interconnectors, could one day link together the energy supplies of every region in the continent. The Ethiopia-Kenya Electricity Highway is one of many interconnector projects in Africa.

How much does the Ethiopia-Kenya electricity highway cost?

The Ethiopia-Kenya Electricity Highway follows the model of other interconnectors in Africa, including one between Zambia and Namibia, which has run since 2010 and cost \$300 million to construct, and a 1,000-mile interconnector between two regions of the Democratic Republic of the Congo, running since 1982 and costing over \$800 million.

Does Ethiopia have a power supply for Kenya?

Since the highway opened, Ethiopia's electricity supply has provided vital backup for Kenya, which has been importing 200 megawatts (MW) of power daily from its neighbor, equivalent to around 10% of the peak demand of Kenya's national grid. The interconnector has the capacity to transfer up to 2,000 MW.
