

What is energy in Austria?

Energy in Austria describes energy and electricity production, consumption and import in Austria. Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas supplies. It is planned by 2030 to become 100% electricity supplied by renewable sources, primarily hydro, wind and solar. [citation needed]

Does Austria have a reliable electricity supply network?

Austria has a highly reliable electricity supply network- thanks mainly to a diversified mix of energy sources which ensures that generating capacity can be put to optimum use at any time. This section of our website tells you everything you need to know about the Austrian electricity system.

What is Austria's energy plan?

Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas supplies. It is planned by 2030 to become 100% electricity supplied by renewable sources, primarily hydro, wind and solar. [citation needed] The Austrian energy plan made in 2020 has the following targets:

Does Austria have a high share of renewables in its electricity mix?

Austria has a high share of renewables in its electricity mix - 71 per cent in 2021 according to Eurostat data. Mountains, many rivers and high rainfall mean hydropower is the backbone of its renewables network but now the country is building on that with other forms of green energy.

Does Austria have an above-average gas supply?

The Austrian Energy Agency has analysed which energy policy strategies, decisions and measures from 1945 to 2020 led to Austria's above-average exposure to gas supplies and which lines of argument have become established over the decades. Last but not least, it shows which conclusions can be drawn for the future and used for a new risk assessment.

What is the largest energy company in Austria?

OMV AG, a multinational integrated oil, gas and petrochemical company, is the largest energy business in Austria, with a turnover of EUR36 billion in 2021.
