What is a fire proof storage container?

Our fire proof storage containers are fully tested and certified as REI 120 in accordance with the current European standard EN 13501-2 and allow you to store flammable substances close to buildings or directly on the production floor.

Why is lithium battery fire protection important?

Prevent the threat of both internal and external fire spread with effective lithium battery fire protection. The insulating properties of the lithium battery container allow for the safe storage and transportation of high-value flammable goods. Lithium batteries have the potential to 'short', leading to thermal runaway.

Why is AVD a fire-resistant storage container?

The AVD fire-resistant storage container acts as a thermal shield, reducing the threat of potential heat transfer. That makes it the perfect solution for transporting and storing potentially combustible products, such as batteries, fireworks and other flammable chemicals. Make an enquiry to discuss your lithium battery fire protection needs today.

Are lithium batteries fire-resistant?

Lithium batteries have the potential to 'short', leading to thermal runaway. This poses a fire risk to the surrounding environment if these batteries are not stored appropriately. The AVD fire-resistant storage container acts as a thermal shield, reducing the threat of potential heat transfer.

Can chemstore store lithium ion batteries?

Chemstore, the hazardous materials experts, have added a fire-proof case for the safe storage and transport of lithium-ion batteries to their lithium-ion battery storage range. The Zarges K470 battery box is a high quality aluminium container which is suitable for up to three lithium-ion batteries of 814 Wh.

A thick steel box is better but also not guaranteed to contain a fire. Advantages of both are that in case of a fire, exploding, overheated cells won't spread the fire to other areas with more flammable materials. And if the bag or box has handles you can possibly move the battery outside, for instance with the help of a broom stick.

I searched online for a lithium-ion battery storage bag that could contain a battery fire, should the bike battery malfunction. There were a lot of options. However, in my research, I saw a lot of people saying that battery storage bags aren't very good and that an ammo storage box is better at containing the fire of a lithium-ion battery.
