

French Polynesia be energy solutions

How much electricity does French Polynesia use?

French Polynesia, whose per capita gross domestic product is the second highest among Pacific Islands, is also above average in its per capita electricity consumption. Electricity per inhabitant is 2468 (kWh).

How much electricity does Tahiti use?

Electricity per inhabitant is 2468 (kWh). Tahiti has a goal of reducing its fossil fuel consumption and shifting to renewable sources of electricity generation by 50% by 2020, yet it only had 26% in renewable energy in 2014 (Hourigary et al., 2014).

Does Tahiti have a refinery?

Tahiti imports its petroleum and has no local refinery or production (French Polynesia Population, 2014). The Pacific Islands are home to some of the countries that are most at risk from the effects of climate change.

Be Energy is planning an industrial-scale regeneration centre covering more than 1,500m²; to achieve unprecedented treatment capacities (350 to 400 batteries/day). This eco-industrial site will be the pilot centre of excellence for regeneration, the new Be Energy headquarters and the R& D centre with two new integrated laboratories.
