How Solar Energy Works. Solar panels are typically mounted on the rooftop but can also be ground mounted. The panels harness energy from the sun and converts it into usable power in your business. If your system produces more power than you can use at any given time, the excess solar is sent to the Georgia Power grid.

As a family-run business, we care about our customers We want to hear from you We're a small family-run business. And even though we've grown over the years, our values remain the same: natural, wholesome food, support for local farmers and a personal touch.
