A map illustrating the locations of the United States (orange) and Greenland (green) Since 1867, the United States has considered, or made, several proposals to purchase the island of Greenland from Denmark, as it did with the Danish West Indies in 1917. While Greenland remains an autonomous territory within the Kingdom of Denmark, a 1951 treaty gives the United States ...

In the 1960s and 70s, Greenland was subject to one of the most impactful eugenics programs ever implemented. At least 4,500 Inuit women were involuntarily implanted with IUD's without their knowledge or consent - about half the fertile population at the time. Within a generation, the birthrate declined by 50%, which led to multigenerational ...

The prehistory of Greenland is a story of repeated waves of Paleo-Inuit immigration from the islands north of the North American mainland. (The population of those islands are thought to have descended, in turn, from inhabitants of Siberia who migrated into North America through Beringia thousands of years ago.) Because of Greenland's remoteness and climate, survival ...

The politics of Greenland, an autonomous country (Greenlandic: nuna, Danish: land) within the Kingdom of Denmark, function in a framework of a parliamentary representative democratic dependency, whereby the prime minister is the head of government, and of a multi-party system. Executive power is exercised by the government. Legislative power is vested in both the ...
