

Why are SMEs important in Guatemala?

However, the number of tourists visiting Guatemala has grown at a slower pace than in most other Central American countries. 9.48. SMEs play a key role in the provision of services to tourists. They constitute the "life blood of the travel and tourism industry worldwide" (Erkkila 2004).

How are electricity prices regulated in Guatemala?

Electricity prices in Guatemala are regulated by the CNEE (Comisi#243;n Nacional de Energ#237;a El#233;ctrica) based on a total of generation, transmission, and distribution costs. Generation costs are determined by a combination of energy and capacity costs of long-term energy supply contracts and the cost of purchases in the spot market.

Why are SMEs not in international trade in Guatemala?

Most of Guatemala's traded goods originate or are destined for large firms. There may be several reasons for the reduced presence of SMEs in international trade; one of them is that SMEs confront many difficulties for the implementation of an efficient logistics design in order to integrate into global supply chains.

How can Guatemala improve remittance market?

According to the General Principles, Guatemala's remittance market could benefit from various improvements including a stronger consumer protection basis and better governance and risk management in the market. 64Cirasino and Garcia (2008). 91 6.5. PROPOSALS FOR STRENGTHENING FINANCIAL ACCESS 6.25.

Why are SMEs not interested in clusters in Guatemala?

In some regions of Guatemala, SMEs are no longer interested in participating in clusters because of unsatisfactory past experiences. Therefore it is important to differentiate new initiatives. One way is to simply change the name "cluster", for instance to "integrated community tourism".

How much do SMEs contribute to GDP and employment in Guatemala?

In Guatemala, the contribution of the SME sector to GDP and employment are substantial. The Guatemala Federation of Small and Medium Enterprises estimates that SMEs contribute 40 percent of GDP and 85 percent of employment (2009). The State of the Region report estimates that 80 percent of employment is in firms with less than 20 employees (2008).

If the dealership can charge and discharge the battery and measure better than 70% of new capacity then you will have more than 70 miles range. the range you currently have seems well short of the spec. If they cannot, they must replace the battery pack as it is faulty - its not your problem the SME is reporting errors - presumably cell errors.
