A typical Guernsey home has at least one roof that faces east, south or west, or a flat roof that may be open to all the sun's orientations. From a few panels to four panels or more and typically 6 to 10 panels, you can maximise your generation by maximising your roof spaces.

Is the price of solar panels falling? The price of solar panels has declined substantially over the last decade as the industry has matured and reached production at the largest global scale. Since 2010, residential solar panel prices have fallen by roughly 50% while US solar deployment has grown by over 2,000%.

Efficient and environmentally friendly, the use of solar PV or solar panels in Guernsey is on the up. A fantastic investment, they are a great way to reduce your carbon footprint and make your home or property more energy efficient and eco-friendly, whilst also offering a greater financial return than savings in the bank.

Guernsey's average residential electricity rate per kilowatt hour is 15.21 cents per kilowatt hour. This is, unfortunately for their inhabitants, 24.44% more than Wyoming's average price of 12.23 cents, which ranks the city 165th best for average electricity price out of 205 cities in the state.

Solar water heating systems, or solar thermal systems, use energy from the sun to warm water for storage in a hot water cylinder or thermal store. Because the amount of available solar energy varies throughout the year, a solar water heating system won't provide 100% of the hot water required throughout the year.
