SUNNY ISLES BEACH, FL / ACCESSWIRE / March 28, 2023 / Elektros (OTC PINK:ELEK), an emerging leader in the electric mobility industry, announces the launch of its new clean energy technology brand, Elektros Energy. Elektros Energy brand will better reflect its focus on such areas as Lithium mining, EV charging, solar energy, and innovative solutions [...]

The unified brand offers an end-to-end service portfolio covering solar energy, battery storage, electric vehicle (EV) charging, and renewable energy project financing. This not only simplifies customer experience but also strengthens MARS Energy's position as a key player in the national renewable energy market.

International finance institution the World Bank will support the development of Guinea-Bissau's first solar power plants with a \$35 million grant through its Solar Energy Scale-up and Access project.

The World Bank is supporting the development of Guinea-Bissau's first solar power plants, aiming to decarbonise electricity production and boost electrification. Under the Solar Energy and Access to Electricity Development Project, the World Bank will assist Guinea-Bissau until 2030 and has already approved a USD \$30 million grant. Additionally, the...

The Lomé-based African Biofuel and Renewable Energy Company has extended the closing date for a tender to supply a 20MWc solar photovoltaic (PV) plant at Bissau and two 1MWc plants at Gabu and Canchungo. Bids are now due by 8 May. Lot 1 comprises construction of a 20MWc solar plant at Gardete, 8km from Bissau, as well as a 30kV connection to the B&#244;r substation.

The electricity sub-sector in Guinea-Bissau remains one of the least efficient in West Africa. Serious challenges faced include: (i) discrepancies between supply and demand; (ii) waste resulting from obsolete distribution networks, with a loss rate of almost 47%; (iii) low investments; (iv) the poor commercial and financial performance of the national power utility; and (v) an ...

Guinea Bissau: Power Sector Policy Note EXECUTIVE SUMMARY The electricity sector in Guinea Bissau is in the midst of a transformational reform towards a sustainable development characterized by reliable, greener and affordable service delivery. The electricity sector has been trapped in a downward spiral for decades due to political instability,

Currently, only 33% of Guinea-Bissau's population has access to electricity, with significantly higher costs in the capital city of Bissau. Harnessing Guinea-Bissau's abundant solar resources presents an efficient and cost-effective solution to addressing the country's energy deficit. The Solar Energy Scale-up and Access Project is slated ...
