We have surveyed large-bodied coastal sharks in northeastern Cabo Verde since 2016, with a focus on the higher trophic predator - the tiger shark (*Galeocerdo cuvier*). Using standardized scientific fishing techniques we capture, measure, sex, tag and release large animals. We have also deployed 12 fin-mounted SPOT tags to study their spatial ecology. To date [...]

Shark Bay is located on the northeast coast of Sal Island, a few kilometres south of the village of Pedra de Lume (famous for its Salinas). The beach is rocky, and the shallows extend far from the shore, making the site a perfect breeding and nursery site for lemon sharks, which can safely spend their first years of life here, protected from the predators and other dangers of deep water.
