Household ESS Solutions. Household energy storage equipment is to store electrical energy and use it when needed - also known as electric energy storage products or "battery energy storage system" (BESS), hereinafter referred to as HES. The core component of HES is a rechargeable battery, usually a lithium-ion battery or a lead-acid battery.

Greece. Notes. The first Household Budget Survey (HBS) was conducted during the years 1957/1958, its duration was one (1) year and the sample size was, approximately, 2500 households in the urban areas of the country.
